

ANDREA LISI

PLATFORM & GOVERNANCE · SENIOR SOFTWARE ENGINEER · VIENNA

Vienna, AT · remote / hybrid · lisandr84@gmail.com · linkedin.com/in/andrea-lisi84 · github.com/karedas · andrea-lisi.com

Eighteen years on the web, from hand-built servers to platform architecture and governance. At **Tricentis** I hold a large frontend platform together while it changes every day: the repository, the pipelines, the standards, and how the work of 12+ teams gets in. I sit between those teams as a **gateway**, and stay hands-on underneath. I treat AI as **engineering infrastructure**: the work shifted from writing to deciding, and I delegate only what I can verify. Art school is where I started, and I never stopped drawing.

AI IN PRACTICE

★ Agentic engineering

Claude Code · Cursor · Copilot as daily drivers, IDE and CI

★ Deciding, more than writing

I read and correct far more code than I write

◆ Delegate only what I can verify

not migrations that cannot be walked back

◆ Rules an agent can read

standards made strict and checkable in the pipeline

◆ Context engineering

repo-aware context and guardrails · CLAUDE.md · AGENTS.md

◆ Gated like human code

agentic reviews on the same bar, never a softer one

CORE STACK

TypeScript

React

Next.js

Nx monorepo

Remix / RR7

Vite · Webpack

Module Federation

Zustand · SWR

Storybook

Node.js

PLATFORM & OPS

GitHub Actions

Docker

Cloudflare Workers

Sentry · OTel

Feature flags

LEADERSHIP

Technical strategy & RFC culture · architecture reviews across team boundaries · mentoring and developer enablement · DX as a product · incident management & on-call · stakeholder communication.

Platform & Governance

2023–now

Tricentis · Tosca Cloud · Vienna, Austria · Senior Software Engineer, Staff nomination in progress

– Came in building features for Inventory and the API simulation behind api-playground and api-messages, alongside the team's backend engineers, then was promoted into a team created to govern the growing platform.

– Governance of a micro-frontend monorepo: 16 projects, 12+ teams, one product. What comes in and what stays out, how it is structured, and where boundaries run.

– Maintain it at the architectural level, a two-person function with the platform architect: module boundaries, dependency graph, build times, CI topology, and what has to fail before main.

– Package upgrades and integration platform-wide, with the breakage absorbed before it reaches the teams; shared resources built once rather than per team, and bad practice taken apart.

– The gateway between design and the internal teams on standards: the RFC process, the changes that cross team boundaries, and the fix when something blocks everyone.

feat/ai-augmented-engineering → merged into main

– Our team is tasked with how the company's AI push lands across the monorepo: direction from staff engineering, the how is ours to set, for all 12+ teams.

– Adapt the codebase for a contributor that is not a person: the rules that once merely guided humans now run strict and checkable, because an agent does not sense them, it reads them.

– Integrate what earns its place, from Claude and Cursor to agentic reviews and pipeline checks, on the same gates as human code.

AI-AUGMENTED DELIVERY: HOW I WIRE IT

repo context

CLAUDE.md · AGENTS.md

agents

IDE · CI orchestration

eval gates

quality bars · AI review

main

same bar as human code

telemetry · eval results · review outcomes feed the next iteration

Agents work with the platform's context and rules baked in (CLAUDE.md, AGENTS.md, pipeline-level rule systems); every AI-generated change lands through the same standards, reviews and gates as human code. That is the governance part of the job.

Frontend Developer

2019–2023

Treedom · Florence, Italy · e-commerce platform for tree planting

– Joined to reinforce two developers on the storefront, then rewrote it and drove the full migration off the monolith, owning the frontend track with React, Vue and GraphQL.

– Core team of four: the foundations we laid held as the company scaled from ~20 to 150+ people, with IT growing to 25 developers.

– Built high-traffic campaign pages for a platform that planted millions of trees, then in my last year built the backend of the internal systems from scratch, the ones the foresters run the tree operation with, inside a backend team while coming from the frontend.

01

glacée

Frontend Developer

Forzieri.com · Florence, Italy · luxury e-commerce

- Modernized a **legacy ASP e-commerce end to end**: an incremental migration first to jQuery, then to **React with a Webpack toolchain**.
- The backend came with it: **a custom CMS** that ran the orders and the daily life of the shop, down to the database integration.
- Kept a live luxury shop shipping features throughout the transition, while the stack changed underneath it.

02

œuf à la neige

Head of Web · Full-Stack Designer

Easysystem · Figline Valdarno, Italy · web agency & IT services

- Hired as the studio's designer: **prototypes, print work and visual identities drawn from scratch** for every client project, never assembled from bought templates (Adobe Suite).
- Grew into the **on-premise infrastructure technician**: servers, networking and firewalls designed and installed inside client companies, notably manufacturers in Tuscany's leather and fashion district. I learned networking with my hands on it.
- A decade owning **every step for dozens of clients**, from small shops to corporate: from the first sketch of a brand to the servers it ran on.

/ SIDE PROJECTS

Lumina · luminamud.com
A fantasy MUD where words shape the world. Node.js, MongoDB, Socket.io, React, Cloudflare; built end to end with the same AI-augmented workflow I use at work.

Lockhound · github.com/karedas/lockhound
Zero-dependency CLI (npx lockhound) that finds and kills the Windows processes locking a folder, via the Restart Manager API.

/ EDUCATION

IFTS Advanced Technical Certificate, Software Development: Java web application programmer diploma.

Diploma in Arts, Istituto d'Arte di Firenze. Drawing first, then years of the violin. I never stopped, and it is where the design half of this CV comes from.
