

ANDREA LISI

FRONTEND PLATFORM & GOVERNANCE - SENIOR SOFTWARE ENGINEER - VIENNA

VIENNA, AT | HYBRID | LISANDR84@GMAIL.COM | LINKEDIN.COM/IN/ANDREA-LISI84 | GITHUB.COM/KAREDas | ANDREA-LISI.COM

Senior Software Engineer focused on frontend platform architecture, governance and developer experience. At Tricentis, I work on the frontend platform behind Tosca Cloud, a micro-frontend monorepo shared across 16 projects and 12+ teams. I stay hands-on with platform-wide problems, shared solutions and rules that do not depend on individual memory. I started in design and moved through frontend, full-stack, infrastructure and platform engineering.

EXPERIENCE	FOCUS	BASED	FOUNDATION
18+ years	Frontend platform & governance	Vienna / hybrid	Art and design

PLATFORM FOCUS

- Monorepos, micro-frontends and module boundaries
- Dependency governance, CI and quality gates
- Upgrades and automated developer policies

/ SELECTED TECHNOLOGIES

- 01 WEB PLATFORM
- TypeScript | JavaScript | HTML
Modern CSS | DOM & Web APIs
- 02 FRONTEND & ARCHITECTURE
- React | Next.js | Vue | Astro
Micro-frontends | Module Federation
- 03 STATE, DATA & APIS
- Node.js | Zustand | GraphQL / Apollo
REST | WebSockets / Socket.io | MongoDB
- 04 BUILD & QUALITY
- Nx | Vite | Webpack | pnpm workspaces
Vitest / Jest | Testing Library
Playwright | Storybook
- 05 PERFORMANCE & SECURITY
- Core Web Vitals | Lighthouse
WCAG 2.2 / ARIA | CSP | OWASP Top 10
- 06 PLATFORM & AI
- GitHub Actions | Docker | Cloudflare
Netlify | MCP | RAG / embeddings
LLM APIs / evals

/ LANGUAGES

Italian	native or bilingual
English	full professional
German	elementary

/ EXPERIENCE

Senior Software Engineer

2023 - NOW

Tricentis - Tosca Cloud - Vienna, Austria

- Frontend platform behind Tosca Cloud, a micro-frontend monorepo shared across **16 projects and 12+ teams**.
- Govern architecture, module boundaries, dependency relationships and shared platform standards across the monorepo.
- Work with the platform architect on build performance, CI topology, dependency structure and quality gates.
- Own platform-wide package upgrades and integrations, absorbing breakage before it reaches individual teams.
- Act as a technical gateway for RFCs and cross-team changes; define agent-readable rules and automated checks.
- Stay hands-on with implementation, debugging and platform-wide technical issues.

Frontend Developer

2019 - 2023

Treedom - Florence, Italy

- Joined the frontend team and later took ownership of the frontend track, leading the storefront migration away from the monolith using React, Vue and GraphQL.
- Rebuilt and evolved the storefront foundations as the company scaled from around 20 to **more than 150 people**.
- Built high-traffic campaign experiences for a platform responsible for planting millions of trees.
- In the final year, built the frontend of the internal back-office systems from scratch for forestry operations.

/ EXPERIENCE CONTINUED

Frontend Developer

2017 - 2019

Forzieri.com - Florence, Italy

- Modernized a live luxury e-commerce platform through an incremental migration from ASP and jQuery to React.
- Kept the production shop live and continued shipping features throughout the migration.
- Worked on the storefront, the internal CMS and the architecture changing underneath both.

Head of Web - Full-Stack Designer

2007 - 2017

Easysystem - Figline Valdarno, Italy

- Started as the studio's designer and expanded into web development and technical infrastructure, eventually owning projects across their full lifecycle.
- Designed websites, visual identities, print materials and interfaces from scratch.
- Built and maintained frontend and backend applications.
- Designed and installed on-premise infrastructure including servers, networking and firewalls for client companies.

/ HOW I WORK

01 STRUCTURE FIRST

Module boundaries, dependency rules and ownership need to be visible before the codebase grows.

02 EXPLAIN THE RULE

A rule travels with its reason. Otherwise it becomes ceremony that teams only endure.

03 MAKE IT CHECKABLE

Once a convention is settled, CI enforces it. The platform must not depend on memory.

04 STAY IN THE CODE

I keep implementing and debugging, especially when a problem crosses teams.

/ PERSONAL PROJECTS

Lumina luminamud.com

A fantasy MUD where words shape the world. Built end to end with Node.js, MongoDB, Socket.io, React and Cloudflare.

lockhound github.com/karedas/lockhound

Zero-dependency Windows CLI that finds and terminates processes locking a folder through the Restart Manager API.

/ EDUCATION

IFTS Advanced Technical Certificate

Software Development, Java web application programmer diploma.

Diploma in Arts - Istituto Statale d'Arte di Firenze

Field of study: Art and Design. The background that still shapes how I approach software architecture.
