

ANDREA LISI

STAFF FRONTEND ENGINEER · VIENNA

Vienna, Austria · remote / hybrid lisandr84@gmail.com www.andrea-lisi.com github.com/karedas
linkedin.com/in/andrea-lisi84 N 48°12'31.4" · E 16°22'38.7"

Eighteen years across the full arc of the web, from hand-built servers to cloud platform governance. Today I set technical direction for the **Tosca Cloud frontend platform** at **Tricentis**: monorepo architecture, engineering standards, and the delivery workflows 12+ product teams build with. Underneath the platform work I remain a **hands-on senior engineer**: shipping, reviewing and debugging alongside the teams I serve. I treat modern AI as **core engineering infrastructure** (agentic coding, reviews and gated quality, integrated across the delivery chain), not as a demo. My job is making other engineers faster, safer and more ambitious.

EXPERIENCE	FOCUS	WORKFLOW	DISPOSITION
18+ years	Platform & governance	AI-augmented	Pragmatic, no hype

AI IN PRACTICE

- ★ **Agentic engineering**
Claude Code · Cursor · Copilot as daily drivers, IDE and CI
- ★ **Prompt & context engineering**
repo-aware context systems, guardrails
- ♦ **AI tooling integration**
agentic reviews, CI checks, agent context and rule systems
- ♦ **RAG & embeddings**
retrieval over docs and codebases
- ♦ **LLM APIs & evals**
Anthropic · OpenAI · quality gates in CI
- ♦ **AI security**
OWASP LLM Top 10

Frontend Platform & Governance · Staff Scope 2023–now
Tricentis · Tosca Cloud · Vienna, Austria · Senior Software Engineer, Staff nomination in progress

- Own the **frontend platform architecture** of Tosca Cloud: Nx monorepo orchestration, module boundaries, dependency governance and CI topology across 16 projects.
- With the platform architect, form the **two-person governance function for 12+ development teams**: drive the RFC process and architectural standards, steer the changes that cross team boundaries, partner with UX and Security.
- Drive the **maintenance, modernization and scalability of the entire product**: micro-frontend architecture, repo and build tooling, delivery pipelines, engineering standards, observability; bottlenecks are measured first, then engineered out.
- Steward the platform all round**: security and vulnerabilities, dependency upgrades, tooling adoption, design system integration, performance and best practices.
- Joined as an engineer shipping features across the monorepo for two product teams; the results led to being asked to **co-own platform governance** with the architect.

feat/ai-augmented-engineering → merged into main

- Integrate AI across the **delivery chain** for all 12+ teams: assisted coding, agentic reviews, pipeline checks, and the context and rules the agents run with.
- Evaluate and adopt tools as the **landscape moves**, from Claude and Cursor to whatever lands next, adapting each to the platform's standards instead of bolting it on.
- Keep AI work **inside the governance line**: same standards, reviews and gates as human code.

AI-AUGMENTED DELIVERY: HOW I WIRE IT

Agents work with the platform's context and rules baked in (CLAUDE.md, AGENTS.md, pipeline-level rule systems); every AI-generated change lands through the same standards, reviews and gates as human code. That is the governance part of the job.

Frontend Developer 2019–2023
Treedom · Florence, Italy · e-commerce platform for tree planting

- Joined to reinforce the storefront, then helped drive the **full migration away from the monolithic architecture**, owning the frontend track with React, Vue and GraphQL.
- Core team of four (two frontend, two backend), constantly improving product, platform and core architecture: the **foundations we laid held as the company scaled from ~20 to 150+ people**, with IT growing to 25 developers.
- Built and evolved **high-traffic campaign pages** for a platform that planted millions of trees, moving the storefront to a component-driven architecture.

0alinit

Frontend Developer

Forzieri.com · Florence, Italy · luxury e-commerce

2017–2019

– Modernized a legacy ASP e-commerce end to end: an incremental migration first to jQuery, then to React with a Webpack toolchain, spanning frontend, backend and the database integration.

– Kept a live luxury shop shipping features throughout the transition, while the stack changed underneath it.

Head of Web · Full-Stack Designer

Easysystem · Figline Valdarno, Italy · web agency & IT services

2007–2017

– Hired as the studio's designer: prototypes and visual identities drawn from scratch for every client project, never assembled from bought templates (Adobe Suite).

– Grew into the on-premise infrastructure technician: servers, networking and firewalls designed and installed inside client companies, notably manufacturers in Tuscany's leather and fashion district.

– A decade owning every step for dozens of clients, from small shops to corporate: from the first sketch of a brand to the servers it ran on.

/ SIDE PROJECTS

Lumina · [luminamud.com](#)
A fantasy MUD where words shape the world. Node.js, MongoDB, Socket.io, React, Cloudflare; built end to end with the same AI-augmented workflow I use at work.

Lockhound · [github.com/karedas/Lockhound](#)
Zero-dependency CLI (npx lockhound) that finds and kills the Windows processes locking a folder, via the Restart Manager API.

/ EDUCATION

IFTS Advanced Technical Certificate, Software Development:
Java web application programmer diploma.

Diploma in Arts, Istituto d'Arte di Firenze: where the design half of this CV comes from.

portfolio

Authorization to process personal data granted pursuant to EU Reg. 2016/679 (GDPR).
